Sterilisation Paper Steripap

High performance sterilisation paper Steripap

In the healthcare every precaution is very important to ensure risk prevention. For this reason we work rigorously to offer the most effective and safely products that provide the quality expected by our customers.

Dorsan® Steripap is a high purity paper made with alpha-cellulose fibers, free from all environmental contaminants. Used in medical field for wrapping instruments which are to be sterilized by steam (121-134°C) in Autoclaves, by means of ethylene oxide, by Gamma irradiation (50 kGy) or formaldehyde.

We offer a wide range of sizes in colors white, blue or green. The quality of our product is subject to well-defined and regularly monitored standards by means of the standards DIN EN ISO 9001.

Features

Easy wrapping and packaging of instruments and medical devices.

They allow the contents of the packages remain totally sterile.

Protect the contents of the package during storage and transport and promote the aseptic presentation at point of use.
